

Lynx-CustomFit™

Field assembly

Splice-On Connector ver.2

Introduction for Telecoms/Contractors/Technicians

Sumitomo Electric Industries, Ltd.

Types of Field Installable Connectors

Mechanical Splice Type

Fusion Splice Type (Lynx-CustomFit™)

Equipment Cost	Low	High (Fusion Splicer)
Installation	Quick & easy	Easy
Splice Check	Checking leaked light with Visual Light Source	Splice Loss estimation by Fusion Splicer
Optical Loss performance	Good	Excellent (same as factory—connectorization)
Typical Application	FTTH; Home reach, LAN; cable termination	FTTH; Home reach, central office; OSP Cable / Patch cord termination, data center

What is Lynx-CustomFit™?

Lynx-CustomFit™ Uses Fusion Splicers

- Low loss
- No polishing
- No pre-survey
- Installable in small space

Excellent Loss with Fusion Splicer

Mechanical Splice Connector (Non Polish Type)

- Good loss
- Precise mechanical alignment by using matching gel
- Quick installation

Lynx-CustomFit™ (Fusion Splice Connector)

- Excellent loss
- Fusion splice technology directly connects cores
- Easy installation

Screening the Variance of Splice Loss

Mechanical Splice Connector (Non Polish Type)

Loss is not checked.

Lynx-CustomFit™ (Fusion Splice Connector)

Estimated loss is checked.

Excellent Loss with Fusion Splicer

Mechanical Splice Connector (Non Polish Type)

- Good loss
- Precise mechanical alignment by using matching gel
- Quick installation

Lynx-CustomFit™ (Fusion Splice Connector)

- Excellent loss
- Fusion splice technology directly connects cores
- Easy installation

Splice Automatically with Fusion Splicer

Mechanical Splice Connector (Non Polish Type)

- Manual insertion is required to connect fibers
- Connect fibers by using Jigs

Lynx-CustomFit™ (Fusion Splice Connector)

- Automatic splice by fusion splicer
- No special skills needed to connect fibers. Fusion splicer makes acceptable splicing
- Help videos are available

Splice Check

Mechanical Splice Connector (Non Polish Type)

- The visual light source can tell success or failure of the termination

Lynx-CustomFit™ (Fusion Splice Connector)

- Fusion splicer can tell the estimation loss
- During the installation, checking the loss is quite important to meet required loss budget
- Even a beginner technician can terminate correctly

Area of Application: Lynx-CustomFit™

NAP: Network Access Point **LCP:** Local Convergence Point ● Splice Point
