LYNX-S2 cable holder for Lynx-CustomFit™

Optimized for Installing Splice-On Connectors.
Faster Handling. Better Results.

■ Designed for Efficient Fiber Preparation

Y-shaped groove securely positions split cable sheath for precise handling. Dual-lid holder design enables easy loading and coating removal while fiber remains secured in the holder for a more streamlined workflow.

■ Prevents Interference During Splicing

Prevents the cable sheath and aramid yarn from interfering with the wind hood of the fusion splicer

LYNX-S2 cable holder for Lynx-CustomFit™

Optimized for Installing Splice-On Connectors.
Faster Handling. Better Results.

Improved Work Efficiency with the Hot Jacket Remover JR-7S

■ **One-Pass Removal of 0.25mm coating and 0.9mm buffer**

Four steps are reduced to just one. Residual coating debris is also significantly reduced.

■ **Prevents Fiber Breakage During Coating Removal**

No need to redo the cable pre-processing. Skill-free and hassle-free coating removal is now achievable.
