

Vulnerability Disclosure Policy for Fusion Splicers and Related Products

1. Introduction

Sumitomo Electric Industries, Ltd., Precision Mechatronics Department Lightwave network Products Division(hereinafter referred to as "our company") recognizes vulnerabilities related to products and services as important issues. To ensure that our customers can use our products and services with peace of mind, we have established this "Vulnerability Disclosure Policy" to promote measures against vulnerabilities. We will endeavor to implement security measures based on this policy.

2. Scope

This policy applies to Fusion Splicer and Related Products provided by our company.

3. Reception of Vulnerability Information

Our company accepts vulnerability information from those who discover them through the Vulnerability Reporting Contact Point. When directly contacting us regarding vulnerabilities related to products or services, please reach out to the contact point below.

The information you provide will be managed in accordance with our Global Privacy Policy (<https://sumitomoelectric.com/jp/global-privacy-policy>).

4. Investigation of Vulnerability Information and Preparation for Countermeasures

The reported vulnerability information will be verified by the product's design and development department.

If it is confirmed to be a new vulnerability, we will implement countermeasures and prepare for information disclosure.

If it is confirmed not to be a new vulnerability, the response will be concluded upon agreement with the reporter.

5. Disclosure of Vulnerability Information to Customers

Information regarding vulnerability responses for products and the progress of countermeasures will be disclosed.

Information will be prepared for disclosure to the providers of information and product users after appropriate coordination.

6. Vulnerability Reporting Contact Point

Please use the inquiry window on the fusion splicer product site "Contact Us."
